This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

THE MINING RECORD OFFICE.

Considerable loss of capital has frequently resulted from attempts to mine in localities, where a little knowledge of what had been previously done would have shown there was small prospect of success. Through ignorance of the existence or exact extent of old and deserted mine-workings, great danger to the miner is not uncommonly incurred, and human life has been frequently sacrificed. The preservation of Mining Records has for one of its objects the prevention of such loss of life and of property.

A large collection of plans and sections of mines, and important statistical details, are deposited in this Office, under the superintendence of the Keeper of the Mining Records. They are made available for the instruction of students, and may be consulted by those who are interested in the mineral productions of the United Kingdom.

Another and perhaps the most important object of this office is the collection and annual publication of the "Mineral Statistics of the United Kingdom."

NOTICE.

In the "Notice" to the MINERAL STATISTICS for 1871, I expressed my hopes, that under the operation of the Acts of Parliament relating to collieries and metal mines, the returns would be obtainable more promptly, and the publication of the "Statistics" therefore take place earlier than in former years.

These hopes have not been realized. Some of the returns from the metal mines have only been received within the last few days, and, owing to the wording of a clause in the Coal Mines Regulation Act, the returns from the collieries have not been at all available for the purposes of the Mining Record Office, as is explained in the Introduction.

As the "MINERAL STATISTICS," which are published by order of the Lords of the Treasury, has long been regarded, both in this country and abroad, as the standard for reference on all questions connected with the mineral produce of the United Kingdom, it is hoped and believed that some well considered plan for overcoming the existing difficulty will be devised before the time arrives for collecting the returns for the present year.

13th December 1873. ANDREW C. RAMSAY.

INTRODUCTION.

When the "Mineral Statistics for 1871" were issued, hopes were expressed that the returns for 1872 would be published at an earlier period than those for that year had been, and that the "Statistics" in future,—by the operation of the new Acts relating to mines and collieries,—would be yet more exact than they had hitherto been. These hopes have not, however, been realized. "*The Metalliferous Mines Regulation Act,* 1872," fixes unfortunately, the first day of August, as the period when the returns of produce are to be made to the inspector, although all the ores raised in the previous year will have been dressed and sampled, and sold many months earlier.* This year (1873) many of the returns have not been sent to the inspector from the mines until late in November. This explains one of the causes which have prevented an earlier issue of the "*Mineral Statistics for* 1872." Again, the Act requires only a return of the *ores* raised. As such a return would not convey any useful information, it became necessary,—in nearly every case,—to obtain either the value of the ores, or their per-centage produce of metal. This has occasioned considerable additional labour in visiting the mines, or in corresponding with the managers of mines and others. For the ores raised in Cornwall and Devonshire it has been thought advisable to publish the returns made to the *Stannary Court.* These, together with the details of the "Public Ticketings" for copper ores in Cornwall and at Swansea, also published, will enable anyone to check the estimated quantities of metal produced and the values given.

As it respects coal, it has become a question, seeing how closely the progress of our manufacturing industries are connected with the production and cost of fuel, to determine, for each year, with all possible accuracy, the rate of increase in the production of coal from

---

* "THE METALLIFEROUS MINES REGULATION ACT, 1872."

CLAUSE 10.—"On or before the first day of August in every year the owner or agent of every mine to which this Act applies shall send to the inspector of the district, on behalf of a Secretary of State, a correct return, specifying, with respect to the year ending on the preceding thirty-first day of December, *the quantity of minerals sold,* or produced from such mine * * * * The return shall be in such form as may be from time to time prescribed by a Secretary of State, and the inspector of the district on behalf of a Secretary of State shall from time to time on application furnish forms for the purpose of such return. *Every* owner or agent of a mine who fails to comply with this section, or makes any return which is to his knowledge false in any particular, shall be guilty of an offence against the Act."

the collieries of the United Kingdom. Hitherto the quantity of coal raised, has been arrived at by issuing circular forms to all the coal owners, requesting a return to the Mining Record Office of the quantity of coal produced from each colliery. These returns have been, generally, freely given, *it being always very distinctly understood that they would be treated as confidential* and used only to compute the produce of districts. Up to 1871 these voluntary returns formed the basis upon which the returns of coal given in the "Mineral Statistics" were computed. Circumstances, beyond control, in 1871 rendered it imperative to adopt, instead, the returns which had been made to the Colliery Inspectors, and these gave a rate of increase above that which was the rate in previous years. Again, for the year 1872, under the operation of the "*Coal Mines Regulation Act*, 1872," the returns made by the Inspectors to the *Secretary of State for the Home Department* are the sources from which the production of coal given in the following pages are drawn, and the only sources available. The operation of Clause 38* of this Act is to limit the examination of those returns to the Inspectors and the Secretary of State. Consequently the Keeper of Mining Records has not been permitted to examine them, and he has no means of ascertaining whether or not errors have arisen in making those returns, or in the computation of the aggregates, when they are made. This has been done, in former years, with respect to the returns received by this office, in which errors have been often detected, by visiting the districts, and ascertaining on the spot, from every available source, the correctness or otherwise of the quantities given. The only means by which the Keeper of Mining Records is this year enabled to check the returns as they are now given, is by a cautious examination of

---

* "THE COAL MINES REGULATION ACT, 1872."

CLAUSE 38.—"On or before the first day of February in every year the owner, agent, or manager of every mine to which this Act applies shall send to the inspector of the district, on behalf of a Secretary of State, a correct return, specifying, with respect to the year ending on the preceding thirty-first day of December, the quantity of coal or other mineral wrought in such mine, and the number of persons ordinarily employed in or about such mine below ground and above ground, distinguishing the persons employed below ground and above ground, and the different classes and ages of the persons so employed whose hours of labour are regulated by this Act.

"The return shall be in such form as may be from time to time prescribed by a Secretary of State, and the inspector of the district on behalf of a Secretary of State shall from time to time on application furnish forms for the purpose of such return.

"The Secretary of State may publish the aggregate results of such returns with respect to any particular county or inspector's district, or any large portion of a county or inspector's district, but the individual return shall not be published without the consent of the person making the same, or of the owner of the mine to which they relate, and no person except an inspector or Secretary of State shall be entitled, without such consent, to see the same."

the distribution of the coal. This has been attempted on a more extended scale than usual. Returns have been most liberally furnished by the railways and canals; and the quantities of coal exported or sent coastwise have been obtained from the Parliamentary Returns. The value of these tables will be understood by all who thoughtfully examine them.

	Actual Decrease on those Shipments		300,214	

The difference between this and the 365,450 tons given above arises from the deficiency of returns from some of the smaller ports.

The total increase in the quantity of coal carried by railways and by canals in 1872, as compared with that distributed in 1871, as *shown in the returns obtained*, is, as stated, 4,305,617. There are some, not very important lines, carrying coal, from which returns have not been received, and we have no returns of the quantities carried by carts or private railways or trams, directly from the pit's mouth to the manufactory, or for the supply of towns. This, however, would not appear to have been largely increased over former years. The following computation of the coal used in our metallurgies, which is based upon information received

directly from the smelters and ironmasters, shows that in that direction the increase in consumption has been very small:—

		Total of Increase or Decrease -			371,605	365,532
		Actual Increase in the Coal consumed in the above Metallurgies in 1872 -			6,073	

The consumption of coal in the iron manufacture is computed, upon the information furnished to the Royal Coal Commission, at the rate of three tons of coal used, for all purposes, to each ton of *pig iron* produced. For the year 1872, as will be seen in the "*Pig Iron Manufacture Return*," the MINING RECORD OFFICE has sought and obtained, for the first time, returns of the coal used from nearly all the blast furnace establishments. As the result of the economy which has been rigidly pursued since the advance in the price of coal, we have only 51 cwt. of coal given as used for each ton of pig iron produced. This will give the *quantity used in* 1872 *as* 17,191,918 tons only. As it is probable that the quantity given in 1871 is in excess, both years have been computed in the table at the same rate, for strict comparison.

The returns of coal produced, as given by the Inspectors, differ from those which appear in the Mineral Statistics for 1872, as shown below, by the addition of the coal raised in Ireland:—

—	Coal raised in the United Kingdom.	Increase.	Coal raised in Great Britain (Inspector's Return).	Increase.
	Tons.	Tons.	Tons.	Tons.
1871	117,352,028	—	117,439,251	—
1872	123,497,316	6,172,288	123,393,853	5,954,602

It has been shown that the increased quantity of coal carried by the railways is above 4,305,617 tons. It is thought, however, that the following estimation, made with great care, will have a very close approximation to the truth, as showing the TOTAL INCREASE:—

	Tons.
Railways and canals, 1872, increased - -	4,600,000
Exports, 1872, increased - - -	450,505
Iron and other metallurgies, 1872, increased -	6,073
The quantities used at collieries and in mines, *estimated* increase - - - -	10,000
Coal carted or sent by private rail or tram-roads, to ironworks, manufactures, and towns, which does not appear in the above returns, *estimated* increase - -	250,000
	5,316,578
Coastwise Shipments, decrease -	300,214
Actual *estimated* increase -	5,016,364

This leaves about one million tons of coal to be accounted for, which, out of the large quantity which we are now producing, may appear to be but a small amount. It is, however, hoped that such arrangements will be made in future years as will enable the

MINING RECORD OFFICE to present a yet more closely accurate return of the production and of the distribution of our fossil fuel. To enable this to be properly accomplished, it is hoped that the coal owners will express upon the returns made to the inspectors, *their consent, according to the regulation of the Act,* that the Keeper of Mining Records shall "*see the same,*" remembering that "*the individual return*" will be used only, that he, with the sanction of "*the Secretary of State, may publish the aggregate results of such returns.*"

GENERAL SUMMARY of the RETURNS of the MINERAL PRODUCE of the UNITED KINGDOM received by the MINING RECORD OFFICE in the Year 1872.

Number of Mines.	Mineral.	Quantities. Tons.	Cwts.	Value. £
3,001	Coal*	123,497,316	0	46,311,143
266	Iron Ore	16,584,857	0	7,774,874
117	Copper Ore	91,983	0	443,738
162	Tin Ore	14,266	0	1,246,135
455	Lead Ore	83,968	3	1,146,165
63	Zinc Ore	18,542	12	73,951
35	Iron Pyrites (Sulphur Ores)	65,916	3	39,470
15	Arsenic	5,171	15	17,964
3	Wolfram	88	5	993
1	Cobalt	1	0	20
3	Manganese	7,773	0	38,865
1	Fluor Spar	80	12	40
5	Ochres, Umbers, &c.	3,326	15	8.227
1.	Bismuth Ore	2	0	—
1	Chloride of Barium	65	0	180
25	Barytes	9,092	17	7,078
	Clays, Fine and Fire (*Estimated*)	1,200,000	0	450,000
	Other earthy Minerals (*Estimated*)	—		650,000
	Salt	1,309,497	10	654,748
	Coprolites (*Estimated*)	35,000	0	50,000
	Total Value of the Minerals produced in the United Kingdom in 1872			58,913,541

* In the evidence given before the Select Committee of the House of Commons in 1873 on "the present dearness and scarcity of coal," it was said that the rise in wages added one shilling and sixpence to the cost of getting a ton of coal.

METALS obtained from the ORES enumerated, &c. in the UNITED KINGDOM in the Year 1872.

DESCRIPTION OF METAL.	Quantities.	Value.
		£
PIG IRON - - - - Tons	6,741,929	18,540,304
COPPER - - - - „	5,703	583,232
TIN - - - - „	9,560	1,459,990
LEAD - - - - „	60,455	1,209,115
SILVER - - - - Ounces	628,920	157,230
ZINC - - - - Tons	5,191	118,076
Other Metals (*Estimated*) - -	—	2,500
TOTAL VALUE of METALS produced from the ORES of the UNITED KINGDOM in the Year 1872 -		22,070,447

TOTAL VALUE of the METALS produced: COAL and other MINERALS raised, in the Year 1872.

	£
METAL, value of, as above - - - - -	22,070,447
COAL do. - - - - -	46,311,143
MINERALS, Earthy, &c. - - - - -	1,811,826
TOTAL VALUE - - -	70,193,416

The increase in TOTAL VALUE, amounting to 12,871,523*l.*, is chiefly due to the additional cost in "getting" each ton of coal.

ROBERT HUNT, F.R.S.,
Keeper of Mining Records.

Mining Record Office,
Museum of Practical Geology,
Jermyn Street, London,
December 19th, 1873.

MINERAL STATISTICS

OF THE

UNITED KINGDOM OF GREAT BRITAIN AND IRELAND

FOR THE YEAR 1872.

PART I.

METALLIFEROUS MINERALS.

In accordance with the "METALLIFEROUS MINES REGULATION ACT, 1872," the returns made from all the mines to the INSPECTOR are now, and will in future, be given in the MINERAL STATISTICS OF THE UNITED KINGDOM, by the authority of the *Secretary of State for the Home Department.* These are, for 1872, in some respects, imperfect, the return of "*the quantity of mineral sold or produced*" being alone required by the Act. It has therefore been necessary to *estimate*, in most cases, the quantity of metal contained in the ore and its value. This has made it convenient to retain the Stannary Returns, and the statement of Copper Ore sold by Public Tickettings, as usual, for this year. The returns made to the STANNARY COURT are consequently grouped together at the beginning of the book to avoid confusion; the Copper Ores sold by Public "*Tickettings*" preceding the return to the INSPECTOR. The returns as furnished to the INSPECTORS OF MINES follow, for each metalliferous ore, in the order which has been hitherto adopted.

32432. Wt. 3424.

STANNARY RETURNS.

The Produce of the Mines and Tin Streams of CORNWALL and DEVONSHIRE which have paid dues to the Stannary Court for the year ending 25th December 1872.

* NOTE.—A considerable number of the mines making returns to the INSPECTORS have given, in strict accordance with the "Metalliferous Mines Regulation Act, 1872," the quantity of ore raised only. It should be fully understood that this is a very imperfect return. The value of the ore, or its produce, one or the other, is essential for the purposes of the "MINERAL STATISTICS." Although this is not compulsory under the Act, it has been asked for, and in many cases given. Where the value has not been given in the Inspector's return I have *estimated* it either from returns made to the MINING RECORD OFFICE,—those given by the published public sales,—from general knowledge, or from the returns made to the STANNARY COURT. All the *estimated values* of Tin and Copper Ores are printed in *italic figures* to distinguish them.

ROBERT HUNT.

* 50¾ Kilogrammes are equal to an English Cwt., or 1,015 Kilogrammes are equal to an English Statute Ton.

† 1,000 Banca slabs weigh about 32 tons; the average weight of 1,000 slabs Straits tin being from 35 to 40 tons. The weight of the Billiton slabs is the same as the Banca.

The DELIVERIES of BANCA TIN in HOLLAND for the last five years were as follows :—

Months.	For the Year ending April 1873.	For the Year ending April 1872.	For the Year ending April 1871.	For the Year ending April 1870.	For the Year ending April 1869.

1872.

LEAD AND SILVER.

NOTE.—The Returns made to the INSPECTORS of METALLIFEROUS MINES have been taken, in all cases, as the most correct. Some returns have, however, been made to the MINING RECORD Office which have not been sent to the Inspectors. In the greater number of cases the quantities of lead and silver have been estimated upon the data furnished by the returns to the STANNARY COURT, for Cornwall and Devonshire, from assays with which the MINING RECORD OFFICE has been favoured from some of the lead smelters, from the Public Sales, and from the general knowledge of the KEEPER OF MINING RECORDS.

The Total Quantity of LEAD ORE raised and sold in the UNITED KINGDOM during 1872, and SILVER obtained, was as follows:—

LEAD ORE - - - -	83,968 tons 8 cwts.
LEAD - - - - -	60,455 „ 15 „
SILVER - - - - -	628,920 ounces.

The following, computed from the Table of Prices, gives the total values as—

	£	s.
LEAD ORE - - - - - -	1,146,165	0
LEAD - - - - - -	1,209,115	0
SILVER - - - - - -	157,230	0

The Prices of Lead Ore per ton at the Holywell and Aberystwith sales, rejecting a few low and high priced parcels, were:—

Glasgow	Tharsis Sulphur and Copper Co.	15,000
Doncaster	Morris and Co.	1,200
Devonport	South Down Metal and Chemical Co.	600
	Total	253,529

Note.—The firms marked * make their precipitate into fine copper, the others sell it to copper smelters. Those marked † make sulphate of copper direct from the ore.

‡ This quantity was smelted by Messrs. H. L. Pattinson in the usual way; they have no extraction works.

A considerable quantity of the oxide of iron known as "Purple Ore" (which is the residue of the burnt pyrites after the copper is extracted) is used in blast furnaces at Palmer's Shipbuilding and Iron Co., Newcastle, the Ditton Brook Iron Co. near Warrington, and the Darlaston Steel and Iron Co., Staffordshire; the remainder, say 160,000 tons, was used as fettling ore for puddling furnaces; it being in a powder does not require grinding, same as Hematite; the per-centage of iron depends on what pyrites it is made from; when Mason's pyrites* is used it contains about 67 per cent. metallic iron, when Tharsis about 62 per cent., and Bintron 66 per cent.

* Analysis of Purple Ore (Oxide of Iron) made from Mason's Pyrites.

Sesquioxide of Iron	96·00 = 67 % metallic iron.
Lead (as sulphate)	·75
Copper	·20
Sulphur	·36
Lime	·40
Insoluble Residue	2·11
Cobalt, Arsenic, and Chlorine	Traces.
Phosphorus	None.
Soda	·10
Total	99·92

N.B.—The ore as sold usually averages about 15 per cent. moisture.

IMPORTS OF PYRITES in the Year 1872.

1872.

PIG IRON MANUFACTURE.

IRON ORE.—The total quantity of IRON ORE raised in the United Kingdom, as shown in the preceding Returns, amounted to 15,584,857 tons.

FOREIGN ORES imported - - -	801,503 tons.
"BURNT ORES" (Iron Pyrites imported 253,259) used as Oxide, *estimated* - - -	153,529 ,,
Total - - -	955,032

Total quantity of IRON ORE returned as smelted in GREAT BRITAIN, 16,539,889 tons.

NUMBER OF FURNACES IN BLAST.

England - - - - -	449¾
Wales - - - -	122¼
Scotland - - - - -	130
Total - - -	702

PIG IRON produced and COAL returned as used in its manufacture in the Year 1872.

	Pig Iron.	Coal.
	Tons.	Tons.
England - -	4,594,614	11,388,342
Wales - -	1,057,315	2,607,887
Scotland - -	1,090,000	3,215,500
Total - -	6,741,929	17,211,729

When COKE has been given in the return it has been computed as COAL.

MINERAL STATISTICS

FOR THE YEAR 1872.

PART II.

COAL, EARTHY MINERALS, &c.

NOTE.—In consequence of the restrictions placed upon the Returns of Produce made by the COAL OWNERS to the INSPECTORS by the following paragraph of clause 38 of "The Coal Mines Regulation Act, 1872," the responsibility of the correctness of the quantities given this year rests entirely with the Inspectors of Collieries.

"The Secretary of State may publish the aggregate results of such returns with respect to any particular county or Inspector's district, or any large portion of a county or Inspector's district, but the individual return shall not be published *without the consent of the person making the same*, or *the owner of the mine to which they relate*, and no person except an Inspector or Secretary of State shall be entitled, *without such consent*, to see the same."

SUMMARY OF COAL PRODUCE OF THE UNITED KINGDOM, AS RETURNED TO THE INSPECTORS,

FOR 1872.

	Tons.
NORTH DURHAM, NORTHUMBERLAND, AND CUMBERLAND	13,010,000
SOUTH DURHAM	17,395,000
YORKSHIRE	14,576,000
